DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to providing a plurality of modules including at least one child, one of the modules receiving an input command from a source transparent to the module, deciding which child to pass the input command to, and passing such input command to such child for processing, classified in class 711, subclasses 117 and 114.
 - II. Claims 28-33, drawn to a degraded module including a degraded child which is a degraded disk drive, detecting the presence of a new disk drive to replace the degraded disk drive, creating a spanned partition, coupling the spanned partition to the degraded module, and rebuilding the new disk drive by the spanned partition such the new disk drive includes data stored in the degraded disk drive, classified in class 711, subclass 134.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as use in a RAID system which uses another controller or separate method to determine to what module and child to pass commands to and in which it is essential to identify degraded modules and replace these modules in a timely manner. See MPEP § 806.05(d).

Art Unit: 2188

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Midys Inoa whose telephone number is (703) 305-7850. The examiner can normally be reached on M-F 7:00am - 4:30pm.
